Framing the subject

Many beginning photographers stand too far away from their subject matter...this makes their photographs busy, unstructured, and cluttered. This can make the subject matter look unimportant and not worthy of closer attention and the composition may seem out of the photographer's control.

This is a photograph of the human figure while simultaneously serving as a composition of shape, tone, and line. The act of framing a subject using the viewfinder of the camera imposes an edge that does not exist outside of the camera. The shape that this frame creates must be studied in order to create successful compositions.

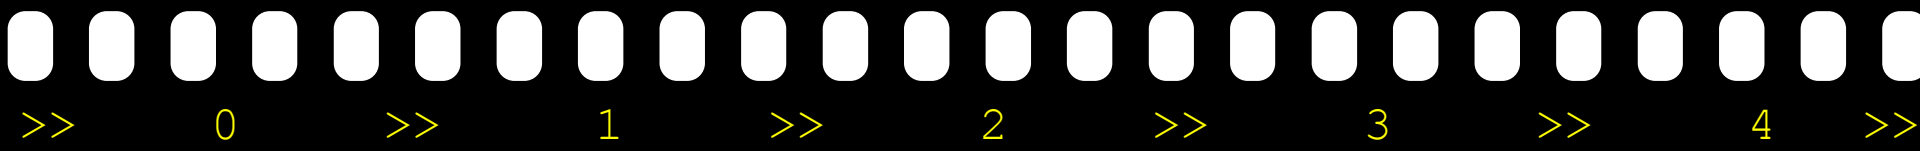

Embrace - Eikoh Hosoe 1970

II. Filling the Frame

Activity One

Filling the Frame

- Moving closer reduces distracting background
- There is no need to include all or the whole of the subject
- The viewer often makes decisions about what the photograph is about from the information that can be seen
- Before clicking the shutter inspect all edges of your viewfinder
- Crop within the camera

Father and Child, Vietnam - Marc Riboud/Magnum

III.The Whole Truth?

Activity Two

The Whole Truth?

- What will you include in the frame?
- How you frame the photograph will be read by the viewer – will it be accurate?
Can you alter the meaning?
- “The photographer edits the meanings and the patterns of the world through an imaginary frame.” — The Photographer's Eye, John Szarkowski

IV. Subject Placement

Activity Three

THE RULE OF THIRDS

Rules of composition have been formulated to aid designers create harmonious images which are pleasing to the eye. The most common of these rules are the '**golden section**' and the '**rule of thirds**'.

The rule of thirds

The golden section is the name given to a traditional system of dividing the frame into unequal parts which dates back to the time of Ancient Greece. The rule of thirds is the simplified modern equivalent. Try to visualise the viewfinder as having a grid which divides the frame into three equal segments, both vertically and horizontally. Many photographers and artists use these lines and their intersection points as key positions to place significant elements within the picture.

VII. Vantage Point

Activity Six

Wil Gleeson

Vantage Point

- A viewpoint that is carefully chosen can reveal something about the subject that is familiar yet strange.
- In order to keep the viewer's attention it is important to explore one's subject from all angles.
- When we move farther away from our subject matter we can introduce unwanted details into the frame that begin to detract from the main subject. Sometimes vantage point can enable the photographer to remove unwanted subject matter using the ground or the sky as an empty backdrop.

VIII. Depth

Activity Seven

Depth

- Successful compositions often make use of depth by strategically placing points of interest in the foreground, the middle distance, and the distance (background).
- The technique of drawing us into the photograph is used often but can be exploited using dark foreground tones that draw us towards the lighter distant tones.
- Photographers can also control how much of the image is seen “in focus”, which can contribute to a sense of depth, i.e. depth of field.

Doctor's Waiting Room, Battersea, London 1975 - Ian Berry

IX. Examples

Spiral Staircase - Tom Scicluna

Many photographers use the lines and intersection points of the rule of thirds as key positions to place significant elements in the picture.

Arc - Tom Scicluna

By tilting the camera the shapes and lines can be carefully organised within the frame. The dominant arc in this image sweeps the edge of the frame and exits at the bottom right-hand corner.

Staircase - Philip Leonard

Diagonal lines that appear in a picture, whether real or suggested, are more dynamic than horizontal lines. The diagonal lines have been arranged to enter the corners of this photograph.

Stacked Chairs - Gareth Neal

A carefully chosen viewpoint can often reveal the subject as familiar and yet strange. A student has explored the interesting lines created by a stack of chairs.
