

## Music Poster

## Part 1

1. Find an image of your favorite musician and download.
2. Open image in Photoshop and cut out from the background using selection tools and masking techniques.
3. Convert your image into high contrast black and white using:  
Image > Adjustments > Desaturation or Image > Adjustments > Black and White  
Image > Adjustments > Threshold (try 128 but change to what works best for your image)
4. Open a New Document:  
File > New > 8.5 x 11 inches and resolution 200 pixels per inch (ppi).
5. Place image file into the new document, resize and move into a position that has space on the side for the musician's name.
6. Using the vertical type tool set the musician's name on the side of your image:  
use 70-140 pt. type, colored black in any style font.
7. Merge the name layer with the image layer.
8. Go to the website: <http://www.azlyrics.com/> and find the song lyrics you want to use.
9. Select and copy (Ctrl C) the lyrics and paste (Ctrl V) into a new layer until all the area is filled with the lyrics. Select the type and change color to black.
10. Duplicate the lyrics layer, select all the type and change the color to white.
