Written Evidence
Sustained Investigation

Identify the question(s) or inquiry that guided your sustained investigation.

Describe how your sustained investigation shows evidence of practice, experimentation, and revision guided by your question(s) or inquiry.

Response:

Through my investigation, I wanted to explore life in the midst of a pandemic. I wanted to show how life was before in contrast to life as we now know it. Fear and chaos erupted, as this is something unlike anything any of us have ever experienced. Yet despite this, people are finding ways to make it through, even in isolation.

Originally, I had a completely different plan for my investigation. However, when the pandemic hit and the world went into lockdown, I felt a strong desire to document what was happening all around us. I realized that I would be taking historical photos. This was an opportunity I just couldn't pass up. So, my focus shifted to life during a pandemic. My investigation begins pre-COVID: image 1 in black and white features friends gathered together in close proximity, a sight that seems so foreign and ancient now. Image 2 is reflective on how life used to be followed by image 3 and 4, showing the dramatic shift into our reality now. Images 5-9 aim to display how people are finding ways to cope and get through this. My investigation ends with image 10, revealing how 2020 high school seniors will culminate their year.
