

Comparative Study Proposal

The Silent Highwayman by John Leech
1858

Untitled by Simon Song
2019

Newtown Creek by Alexis Rockman
2014

My overall theme for this comparative study is corporate pollution. In the first image, I chose this drawing from the industrial revolution in Europe and how damaging they were to the environment because citizens wouldn't pay to clean. The second image is a photo of the current air pollution in China and how bad the smog is. The third image is a painting of all the damage and pollutants that get put into nature from companies.
